CONSTRUCTION COMMUNITY SUPPORT PROGRAMME

Builder Depot's Construction
Community Support Programme,
eligibility criteria, and review process

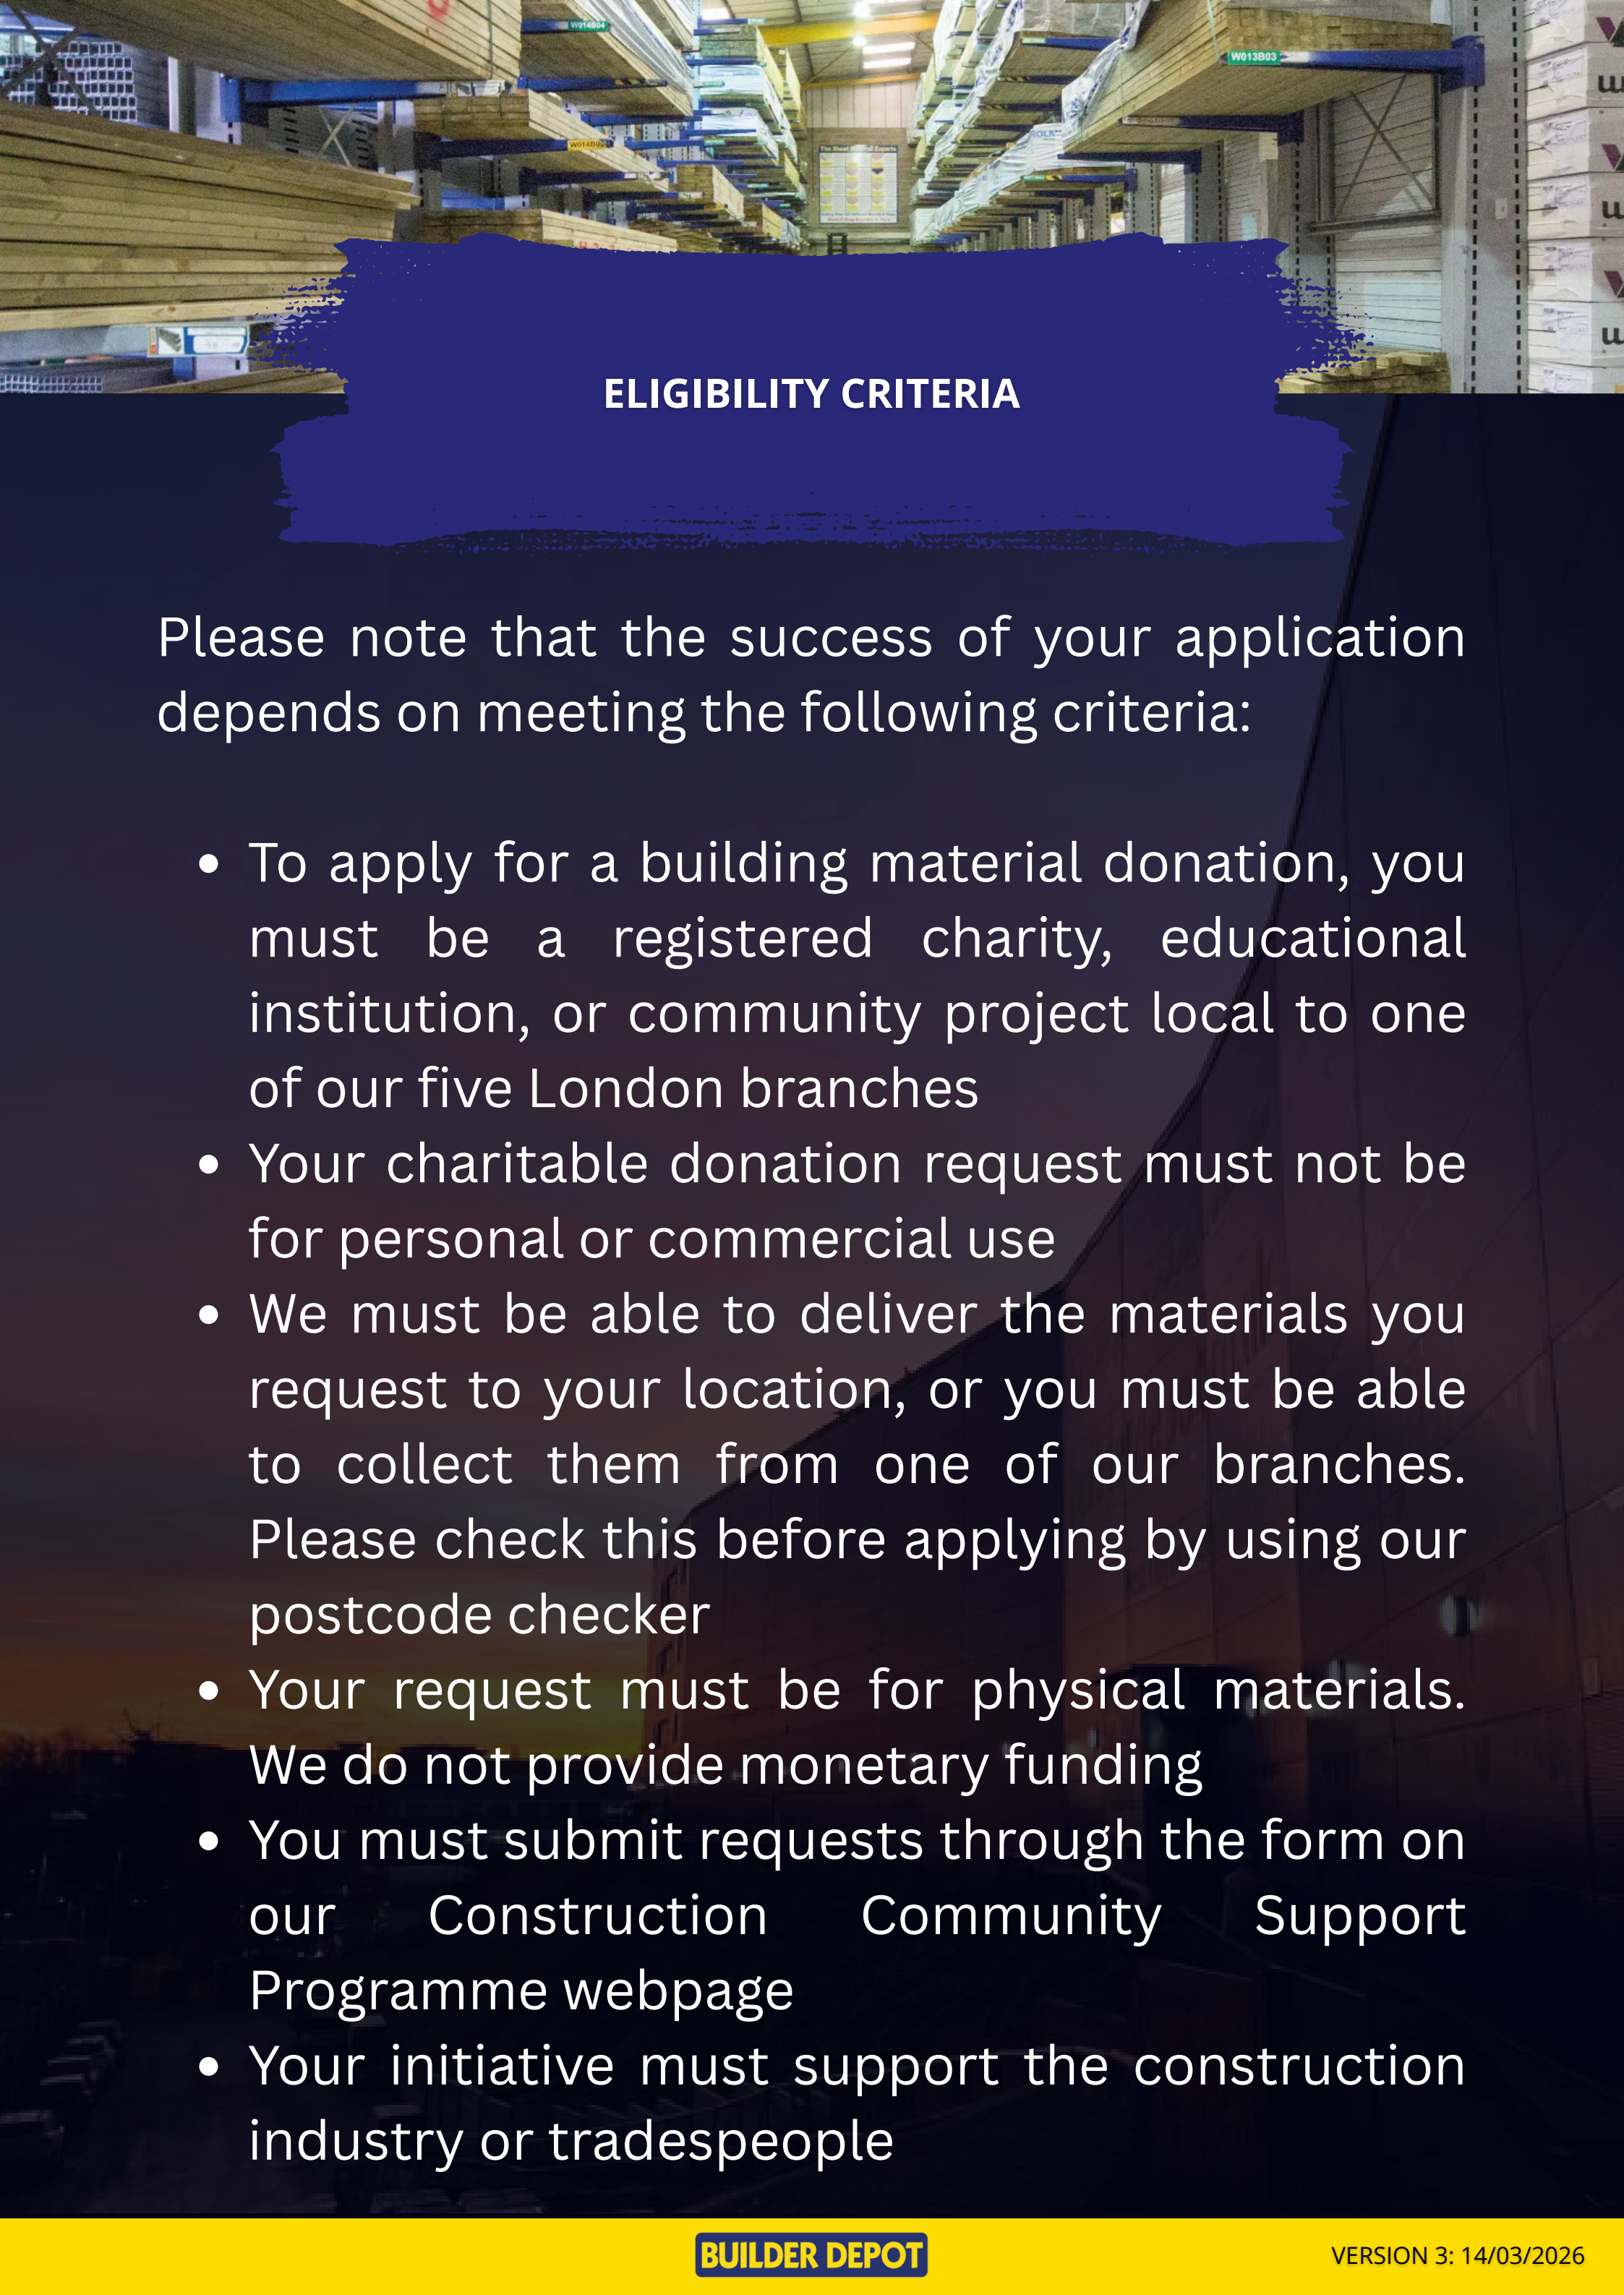

ABOUT OUR CONSTRUCTION COMMUNITY SUPPORT PROGRAMME

Here at Builder Depot, we believe in the power of giving back to our local community and making a positive impact. We want to show our gratitude to the selfless individuals who dedicate their time to growing and strengthening the construction industry. That's why we launched our Construction Community Support Programme (previously known as our Charitable Donations Programme) in 2023.

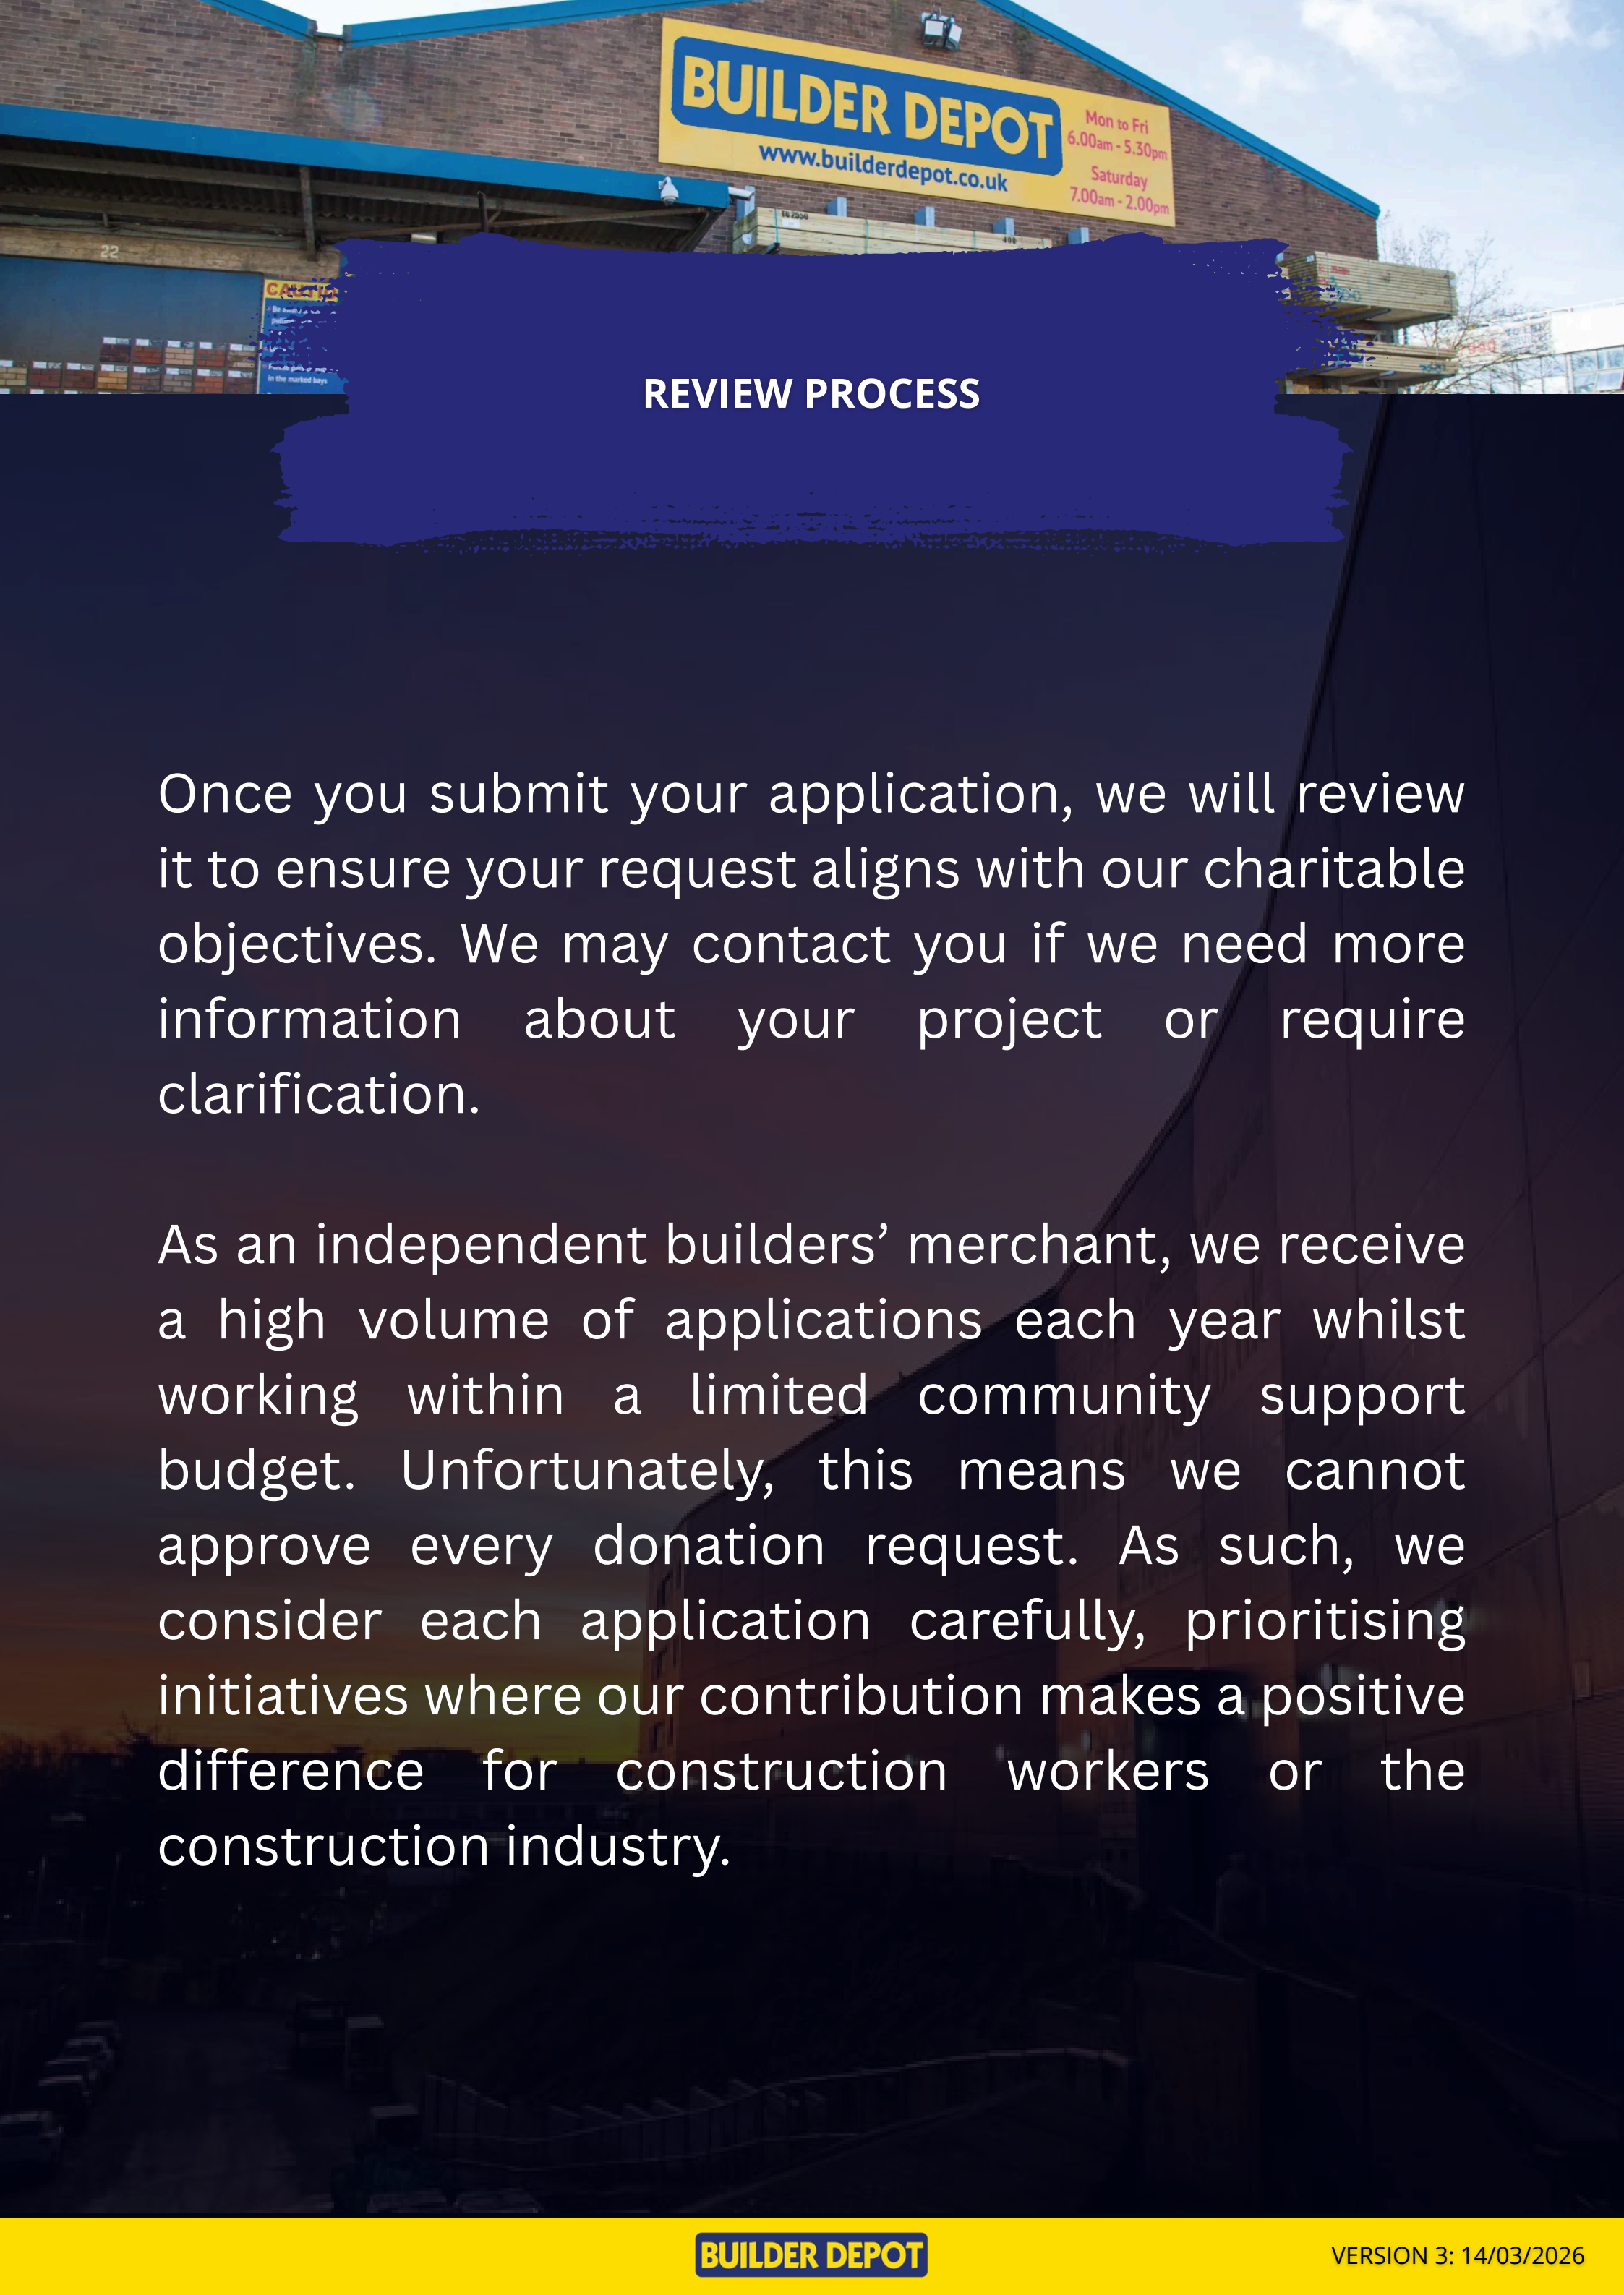

Through our programme, we aim to foster bright futures for tradespeople by donating building materials to institutions that teach trade skills and to charities that support construction workers. We prioritise projects that create positive long-term outcomes, where our resources can make a meaningful difference.

ELIGIBILITY CRITERIA

Please note that the success of your application depends on meeting the following criteria:

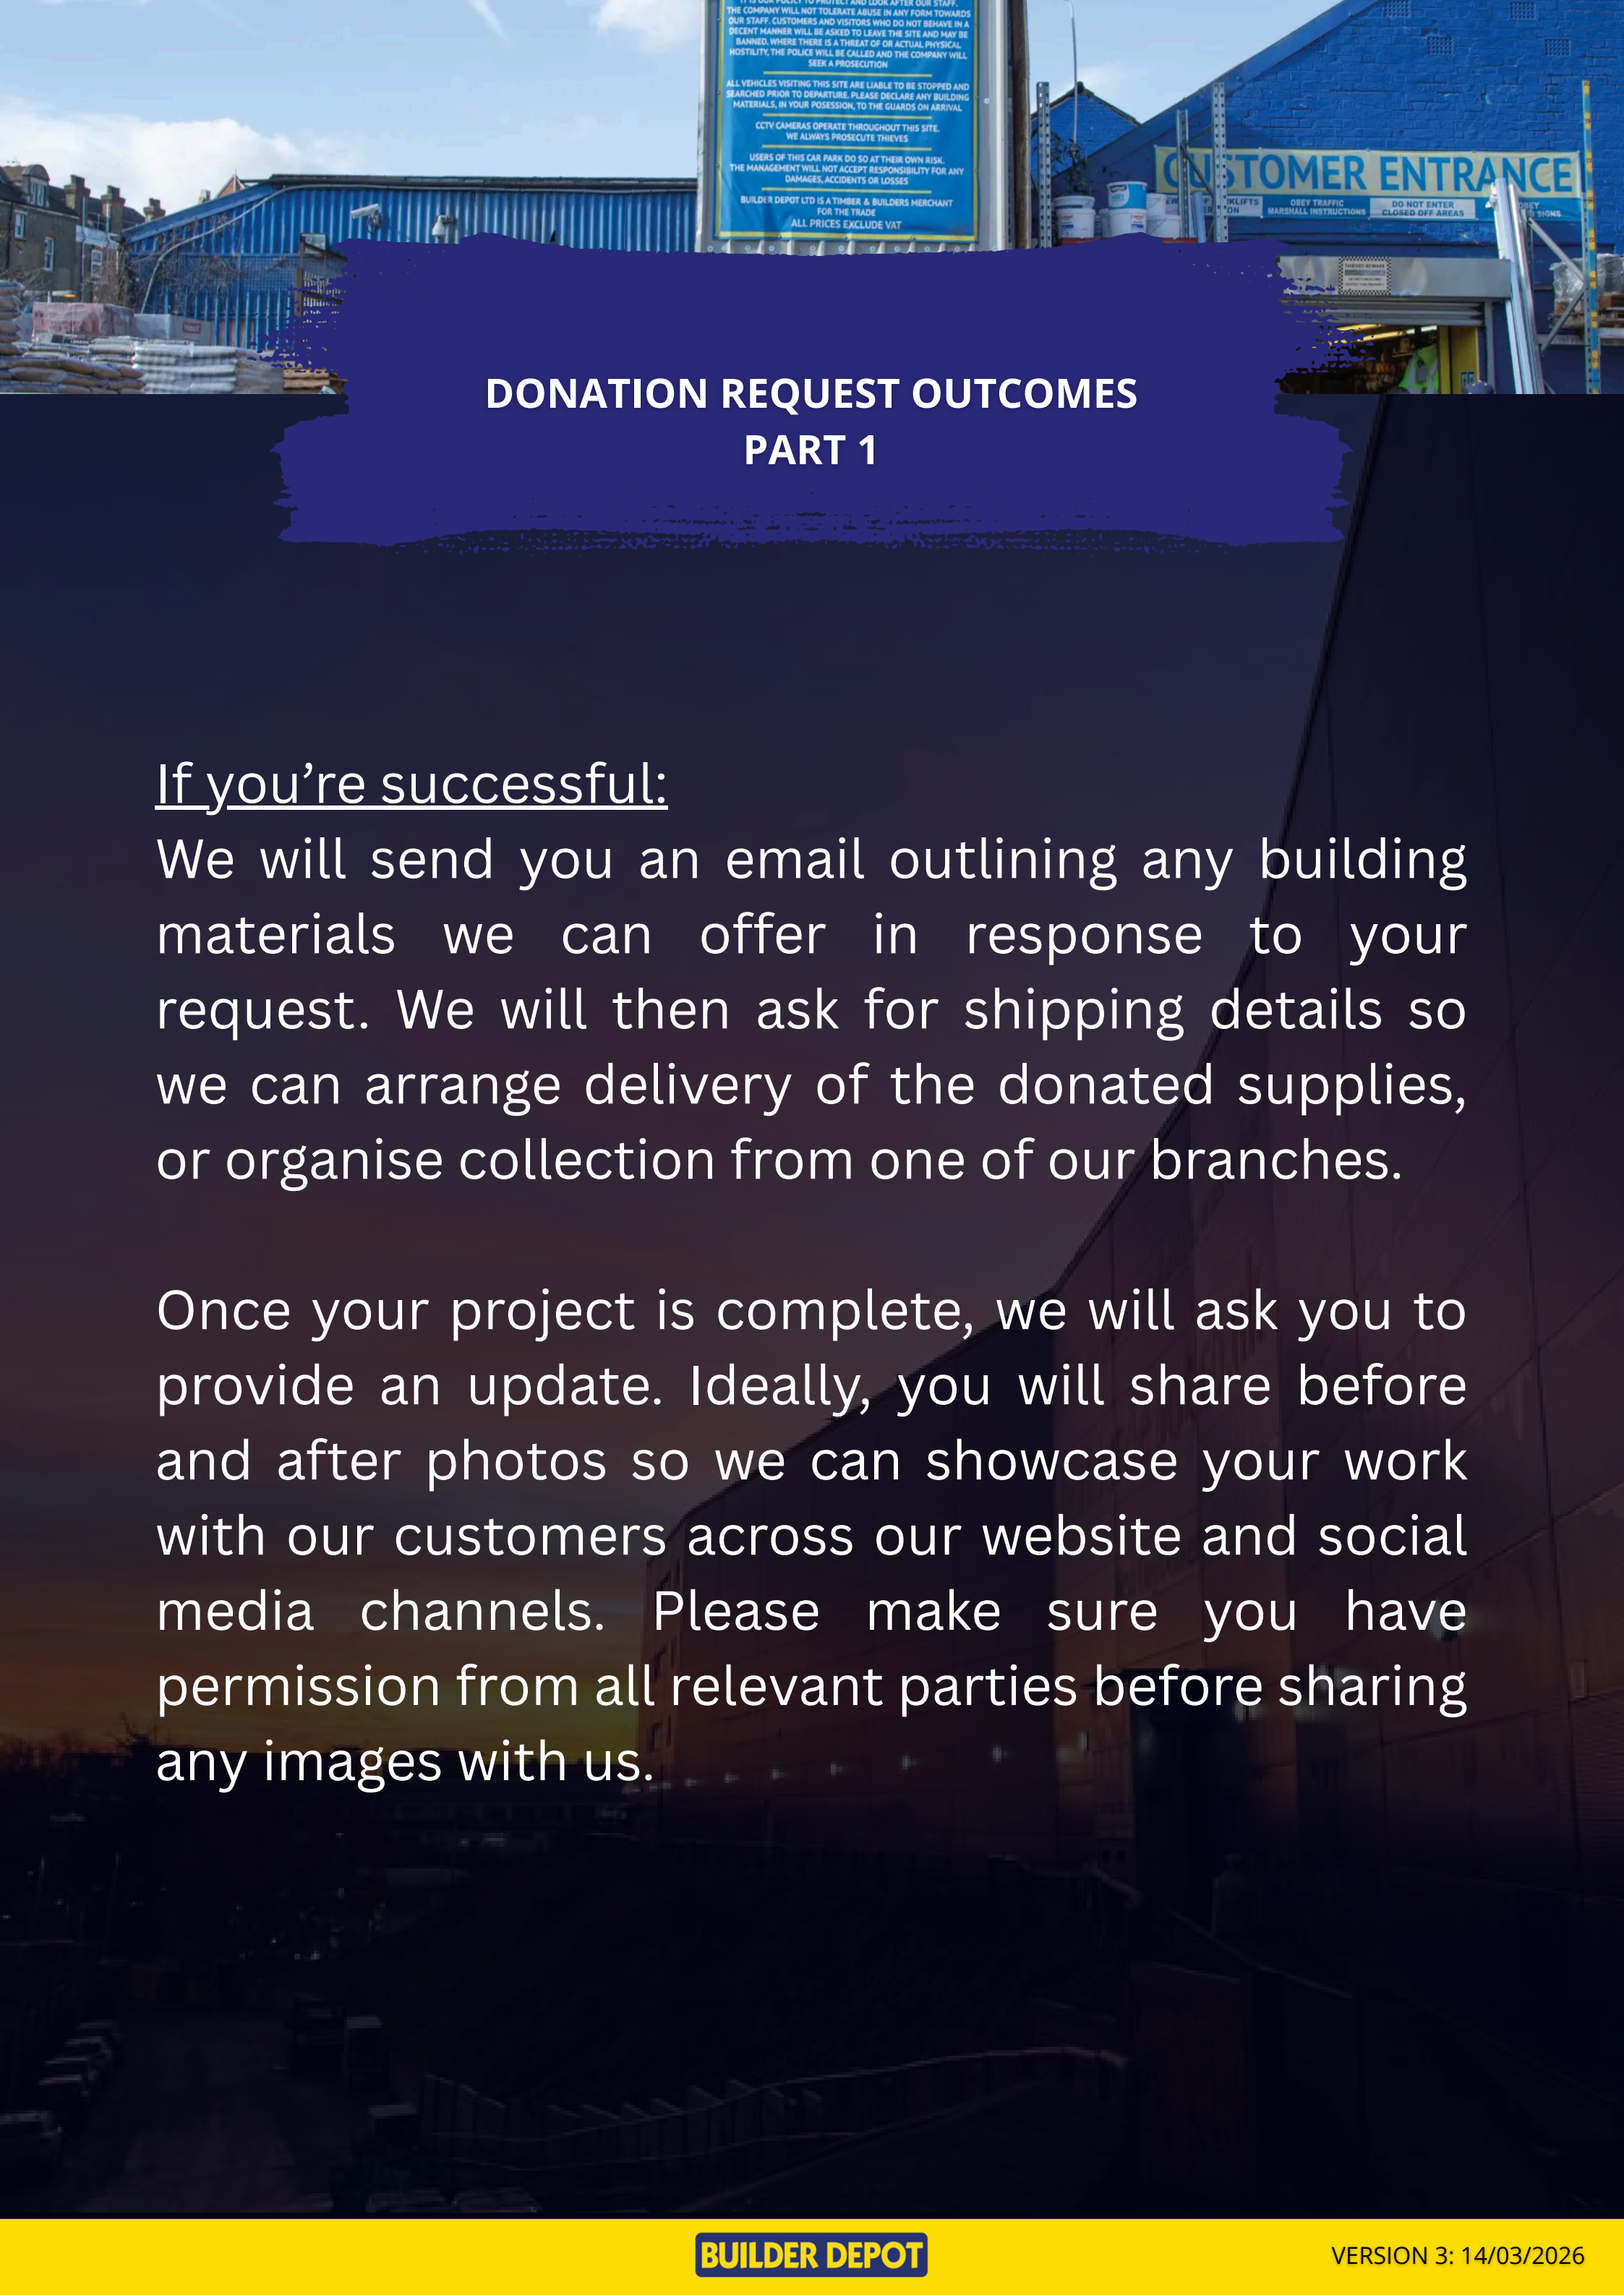

- To apply for a building material donation, you must be a registered charity, educational institution, or community project local to one of our five London branches
- Your charitable donation request must not be for personal or commercial use
- We must be able to deliver the materials you request to your location, or you must be able to collect them from one of our branches. Please check this before applying by using our postcode checker
- Your request must be for physical materials. We do not provide monetary funding
- You must submit requests through the form on our Construction Community Support Programme webpage
- Your initiative must support the construction industry or tradespeople

REVIEW PROCESS

Once you submit your application, we will review it to ensure your request aligns with our charitable objectives. We may contact you if we need more information about your project or require clarification.

As an independent builders' merchant, we receive a high volume of applications each year whilst working within a limited community support budget. Unfortunately, this means we cannot approve every donation request. As such, we consider each application carefully, prioritising initiatives where our contribution makes a positive difference for construction workers or the construction industry.

DONATION REQUEST OUTCOMES PART 1

If you're successful:

We will send you an email outlining any building materials we can offer in response to your request. We will then ask for shipping details so we can arrange delivery of the donated supplies, or organise collection from one of our branches.

Once your project is complete, we will ask you to provide an update. Ideally, you will share before and after photos so we can showcase your work with our customers across our website and social media channels. Please make sure you have permission from all relevant parties before sharing any images with us.

DONATION REQUEST OUTCOMES PART 2

If you're unsuccessful:

Given the high volume of applications we receive per quarter, we cannot provide individual feedback or responses for each charitable request. Please understand that we are an independent builder's merchant with limited resources, and are required to make tough decisions when selecting which projects to prioritise. Even if your application meets our eligibility criteria, we reserve the right to reject or partially fulfil requests during our internal review and approval process. In some cases, we may offer a discount on our products instead of a donation.

Thank you for taking an interest in our Construction Community Support Programme, we look forward to hearing from you!
